

# DATACARD® TRUCREDENTIAL™ PROFESSIONAL SOFTWARE

TRUCREDENTIAL™  
SUITE

## POWERFUL PLATFORM, MULTIPLE EDITIONS

The Datacard® TruCredential™ Suite offers an edition that's just right for you — whether you're just starting a credential issuance program or need to grow your current capabilities.

### Basic, secure ID card issuance

- *TruCredential Express software:* Basic photo capture and data import, credential designer, and drag-and-drop workflows for a single-user environment.
- *TruCredential Plus software:* Signature capture, DSLR camera support, report capabilities, composite field support and SQL server support.

### High-assurance credential issuance

- *TruCredential Professional software:* Smart card support, decentralized data capture, centralized data management, Microsoft Active Directory integration support, Oracle database support and document scan capture support.
- *TruCredential Enterprise software:* Additional PACS and access control system integration support, PeopleSoft HR system integration support and higher scalability up to hundreds of user stations.

## Issue Smart Cards and Other High-Assurance Credentials with Ease

When you need to issue credentials with higher levels of security, Datacard® TruCredential™ Professional software provides a next-generation solution. This modern, intuitive, web-based platform provides the core software tools needed to design, print and manage IDs and credentials. Issue more sophisticated credentials including smart cards, with pre-built support for configuring smart card personalization options via the user interface, which you can also use to capture data and personalize smart cards.

**Proven, feature-rich platform.** This modern credential software integrates the best of our global software lines into one platform. Capable of accommodating more records, users and multiple workstations, this software offers pre-built credential design templates, pre-built workflow templates, drag-and-drop workflows, plus document scan and signature capture device support. It also integrates seamlessly with Active Directory and Oracle, making it easy to populate card data and manage records.

**Secure data management.** Centrally manage credential designs, workflow templates and printer configurations while still allowing data capture from distributed locations. A central administrator can easily manage distributed user access and permissions while allowing for an audit trail.

**Investment protection.** If your needs grow, you can easily scale up to the most high-assurance edition of TruCredential Suite — our Enterprise edition that accommodates hundreds of user stations and retains the features and functionality you currently know and use.
